MRN NAMES DEVELOPMENT DIRECTOR

ALBUQUERQUE, NM—Lisa Breeden joins the Mind Research Network this month as Director of Development. Breeden becomes part of the non-profit research organization's staff following fourteen years as Communications Director for U.S. Senator Pete Domenici. Prior to that she was news director of KOAT-TV.

MRN is dedicated to discovering new ways to diagnose and treat mental illness and other brain disorders. Senator Domenici established MRN ten years ago, and one of Breeden's goals is to raise money and establish an endowment through MRN's Domenici Discovery Fund. The fund provides matching dollars to MRN scientists for their studies of mental illness and brain disorders including schizophrenia, autism, epilepsy, substance abuse and traumatic brain injury.

For more information on the Mind Research Network, please call 505/272-5028 or visit www.mrn.org.
