### LES GIFT ACCELERATES SUCCESS OF MRN'S DOMENICI DISCOVERY FUND

(ALBUQUERQUE)---The Mind Research Network (MRN) today announced a ten-thousand dollar gift to the Domenici Discovery Fund by LES.

"We are honored to have LES join MRN in putting science to work for children and adults who are struggling with brain disorders," said MRN President and CEO John Rasure, PhD.

LES is currently constructing America's first centrifuge uranium enrichment plant near Eunice in southeastern New Mexico. LES is also sponsoring an October reception to benefit MRN. The event will be hosted in Albuquerque by MRN founder U.S. Senator Pete Domenici (Ret., N.M.).

"The LES donation illustrates that this is a company dedicated not only to our region's economic growth, but also to the health and welfare of our communities," said Domenici. "LES is now our partner in finding ways to improve outcomes for individuals and families facing mental illness, brain disease, and brain injury."

The Domenici Discovery Fund supports MRN researchers in their work with advanced neuroimaging and genetic technologies. MRN is uniquely qualified to discover more accurate tools to diagnose and treat schizophrenia, bipolar disorder, autism, addiction, epilepsy, traumatic brain injury, and other brain disease.

#### About MRN

The Mind Research Network is dedicated to the discovery and advancement of clinical solutions for the prevention, diagnosis and treatment of mental illness and other brain disorders. Founded in 1998 and headquartered in Albuquerque, MRN consists of in-house scientists working in collaboration with Harvard, Yale, MIT, the University of Minnesota, the University of New Mexico, national laboratories, and research centers across the nation. For more information on the Mind Research Network, visit [www.mrn.org](http://www.mrn.org).
