TANNER FOUNDATION REPEATS SUPPORT FOR MRN!

(ALBUQUERQUE)---The Clark L. Tanner Foundation this week presented The Mind Research Network (MRN) with a gift of \$5000!

The contribution to MRN's Domenici Discovery Fund helps advance research to find earlier and better ways to diagnose and treat mental illness. The Tanner Foundation is based in Santa Fe, New Mexico. The organization is dedicated to supporting research institutions like MRN that are working to solve the puzzles of schizophrenia. MRN scientists continue development of a diagnostic method to differentiate between schizophrenia and bipolar disorder. The result will be more targeted and personalized treatment.

"The Clark L. Tanner Foundation's continued support will help MRN more quickly bring these kinds of discoveries to the clinic," said Lisa Breeden, MRN Director of Development.

"The Tanner Foundation's yearly contribution to the Domenici Discovery Fund helps us bring the chance of more hopeful outcomes to so many of our family and friends dealing with brain disease and injury."

The Domenici Discovery Fund is named in honor of retired U.S. Senator Pete Domenici (R-NM). Domenici founded MRN in Albuquerque twelve years ago and he continues his passionate work on behalf of the individuals and their families who live every day with mental illness and brain disorders.
