PFIZER SUPPORTS MRN DOMENICI DISCOVERY FUND

ALBUQUERQUE, NM – The Mind Research Network (MRN) announces a two thousand-five hundred dollar contribution to the Domenici Discovery Fund by Pfizer, Inc.

“This donation helps us accelerate our research and ultimately find better ways to diagnose and treat mental illness and other brain disorders,” said MRN President Dr. John Rasure.

Pfizer, Inc. is the world’s largest research-based biomedical and pharmaceutical company. Pfizer is committed to helping change lives across the globe with improved access to health care services and medicines.

“We are pleased that Pfizer has joined us as a partner by supporting the Domenici Discovery Fund and our research, which we expect will result in tremendous breakthroughs. We applaud Pfizer’s corporate responsibility.” Dr. Rasure concluded.

The Domenici Discovery Fund is named in honor of retired U.S. Senator Pete Domenici (R-NM). Domenici founded MRN eleven years ago, and continues his passionate work to bring hope and peace of mind to the individuals and families who live every day with mental illness, brain disease and brain injury. The Fund provides matching dollars to scientists to help further their study of schizophrenia, addiction, epilepsy, autism, alcoholism and traumatic brain injury.

About MRN

The Mind Research Network is dedicated to the discovery and advancement of clinical solutions for the prevention, diagnosis and treatment of mental illness and brain disorders. Founded in 1998 and headquartered in Albuquerque, MRN consists of in-house scientists working in collaboration with Harvard, Yale, MIT, the University of Minnesota, and other universities, national laboratories, and research centers across the nation.
