TANNER FOUNDATION BOOSTS MRN DOMENICI DISCOVERY FUND

(ALBUQUERQUE, NM)—The Mind Research Network (MRN) announces a ten thousand dollar donation to the Domenici Discovery Fund by the Clark L. Tanner Foundation.

“This contribution helps drive the research that already is finding better ways to diagnose and treat mental illness and other brain disorders,” said MRN President Dr. John Rasure.

The Clark L. Tanner Foundation is based in Santa Fe, New Mexico. The organization is dedicated to supporting institutions that result in improved outcomes for the individuals and families suffering from schizophrenia.

“We are especially proud of the Tanner Foundation family’s confidence in the MRN research we believe will dramatically impact clinical treatment for mental illness. The Tanner Foundation propels the next decade of breakthroughs thanks to the Domenici Discovery Fund,” Dr. Rasure added.

The Domenici Discovery Fund is named in honor of retired U.S. Senator Pete Domenici (R-NM). Domenici founded MRN eleven years ago, and continues his passionate work to bring hope and peace of mind to the individuals and families who live every day with mental illness, brain disease and brain injury. Senator Domenici and MRN announced earlier this year research that will help clinicians better differentiate between schizophrenia and bipolar disorder.

About MRN

The Mind Research Network is dedicated to the discovery and advancement of clinical solutions for the prevention, diagnosis and treatment of mental illness and brain disorders. Founded in 1998 and headquartered in Albuquerque, MRN consists of in-house scientists working in collaboration with Harvard, Yale, MIT, the University of Minnesota, and other universities, national laboratories, and research centers across the nation. For more information on the Mind Research Network, visit www.mrn.org.
